We are a very personalized, quality-oriented dental practice that takes pride in getting to know each patient's unique needs and to communicate thoroughly about their oral health. We can also serve Korean-speaking patients.

After dental school graduation, I obtained intensive post-graduate education, including over 12 years in clinical experience and training in Advanced General Dentistry Residency and study groups. I feel privileged to have served the first four years of my career in the U.S. Army treating troops and locals in a year-long deployment to Afghanistan. Continued learning is a

priority for me to implement the latest evidence-based treatment models within our practice.

My dedicated staff and I utilize the latest in technology for our patient's safety and comfort, and offer a completely digital office, from record-keeping to imaging and x-rays. We also provide Cerec CAD/CAM single visit crowns and restorations. All our hygienists have over 20 years of clinical experience. Even our treatment chairs do massage!

We are honored to be a Best Dentist for 2014.
